

P-CHARGE Base Structure

For the stand-alone / detached installation of the P-CHARGE Wallbox Mono

MECHANICAL DATA

- Material: aluminium
- Colour: powder-coated, RAL 9003 (white)
- Weight: approx. 7.4 kg (without the P-CHARGE Wallbox Mono)
- Suitable for all models of the P-CHARGE Wallbox Mono range

FOUNDATION

- When installing the P-CHARGE Wallbox base structure, please adhere to the respective national regulations (location, constructional requirements etc.).
- In order to safeguard a secure and durable anchoring, we recommend to dimension the concrete foundation as follows: L x W x D : 600 x 600 x at least 300mm
- Foundation depth depends on the frost penetration depth!
- Concrete C25/30, minimum reinforcement Q335A folded, concrete cover 6cm
- Anchor bolts "FISCHER FAZ II 8/10 A4"
- The drilled holes in the carrier plate are compatible with the foundation mounting frame (261900-001).

OTHER
